Thermal Performance

The Vinyl

The design of the window and the quality of the extrusion insures the beauty and performance of the finished product. The window systems of Earthwise Windows are designed and extruded by our partner, Deceuninck Inc. Deceuninck is recognized as the world's leading extruder of vinyl window and door systems.

All vinyl is produced from abundantly common natural materials and is thus an extremely eco-responsible product. All of our vinyl profiles are completely recyclable and environmental friendly. www.deceuninck.com

The Spacer

When selecting windows for your home you want to look for products that give you the quality and performance your home deserves. A smart place to start is to look for windows that have the **SpacerWise** insulated glass system.

SpacerWise insulated glass is an advanced "Warm Edge Technology" insulated glass system found exclusively in Earthwise Vinyl Windows. It's smart technology creates a superior warm edge thermal barrier that reduces conductive heat loss through the window.

The **SpacerWise** insulated glass design makes it stronger and better at retaining insulating gas than conventional spacer designs. The **SpacerWise** insulated glass is so energy efficient that it keeps the edges of the window glass warmer, making your home more comfortable in the winter.

So make the wise choice, choose **SpacerWise** insulated glass exclusively in Earthwise Vinyl Windows.

The Glass

Earthwise vinyl windows offers some of the most advanced warm edge technology in our window systems. Our optional **Comfort U WiseGlass** is a value-added Low E product that brings energy savings and comfort to your home.

Comfort U WiseGlass is engineered to provide year round comfort, keeping your home cooler in summer by keeping out unwanted solar heat and warmer in the winter by keeping furnace heat inside.

Comfort U WiseGlass helps your home become more energy efficient and comfortable thanks to almost invisible microscopically thin coatings that block out unwanted solar energy and keep in furnace heat. Additionally, **Comfort U WiseGlass** significantly reduces the fabric fading effects of ultraviolet light and resists condensation and it's effects on your home environment.

So in choosing glass options make the wise choice, choose **Comfort U WiseGlass** found only in Earthwise Vinyl Windows.

Distinctive Style

Along with the beauty of an eclipse, the energy of the sun is blocked by earth or moon. Like this image, the Eclipse Double Hung Replacement Window blocks the escape of costly energy within your home, leaving you a comfortable, controlled setting throughout the year.

The Eclipse is the new, beautifully designed aesthetic replacement window from Earthwise Vinyl Windows. With contour lines and sculpted millwork features, the Eclipse Replacement Window will give your home a fresh, cleanly elegant, new look.

Beyond style, this fully welded vinyl window offers the most technologically advanced design and thermal performance in the window industry. The state-of-the-art materials and precision engineering insures you a quiet, secure environment with unsurpassed efficiency that lowers the cost of comfort year round.

And best of all, the Eclipse Double Hung Replacement Window is an Earthwise Vinyl Window. Earthwise windows are guaranteed to last a lifetime and will improve the comfort and appearance of your home. So make the intelligent choice in windows. Be Windowwise, choose a window by Earthwise.

Earthwise Vinyl Windows

Earthwise is a selective national group of window manufacturing fabricators who produce the same high quality vinyl window system. This alliance of fabricators is called the Earthwise Group.

The group was formed with the purpose of creating a national identity within the window industry and combining production, distribution and marketing strengths.

Verified Quality

Earthwise Vinyl Windows have set the standard for quality and service in the window industry. Our windows and doors are engineered and built to meet the highest standards and specifications in the industry. Earthwise Vinyl Windows are tested to AAMA and NFRC standards, as well as enjoying a partnership with the Energy Star program.

The Energy Star window program is a voluntary partnership between the US Department of Energy and participating window manufacturers. All of our windows using **Comfort U WiseGlass** Low-E are Energy Star compliant.

The National Fenestration Rating Council (NFRC) is a non profit, public-private organization created by the window, door, and skylight industry. It has established a voluntary national energy performance rating and labeling system. All Earthwise Vinyl Windows meet NFRC rating guidelines.

The American Architectural Manufacturers Association (AAMA) is a voluntary organization that establishes material performance standards for the window industry. Our windows meet or exceed the AAMA guidelines.

As you can see, our windows and doors meet or exceed demanding rating requirements, providing a lifetime of top-quality, performance and efficiency.

Manufacturing Excellence

Earthwise windows are all produced with the most technologically advanced, state-of-the-art manufacturing equipment and techniques. Through lean manufacturing and continuous improvement programs, our insulated glass technology and vinyl processing production insures the highest quality and performance in our window systems.
